

## Do you enjoy experiential learning?

Ecology, wildlife and botany are the focus of this exciting field class.

### BIOL 208 Field Studies Course (8 cr.)

Experience a 10-day field trip to explore the High Desert of California and Oregon

Class meets weekly during spring quarter M/W 4:00-5:20

The field trip takes place June 23-July 2. We drive in college vans and camp at Lava Beds, National Monument, Steens Mountain, and Cabin Lake while exploring the surrounding areas.

Transportation and food are provided! Students pay an additional \$250 and bring their camping gear. Class size limited to 14.

Register for BIOL 208 section AK (item # 6143) Questions: contact: Kathleen Perillo (992-2210) [kperillo@clark.edu](mailto:kperillo@clark.edu)

Pronghorn near Burns, Oregon

#### More info:

- If you have had a College level science class, you have the necessary pre-req. for this class
- 8 credits can be daunting on top of an already full spring schedule but the majority of the work comes from the 10-day field experience and the final project (a photo-document)
- \$250 additional fee may seem steep but it amounts to \$25/day for food, lodging and transportation – it turns out to be a real bargain.
- If you love learning by immersing yourself in the outdoors this is truly a wonderful opportunity to earn science credit and have fun at the same time.
